## **VALCOR OFFERS NEW 2-WAY INERT BALANCE-POPPET VALVE**

SPRINGFIELD, NJ - Valcor Scientific, a division of Valcor Engineering Corp. of Springfield, NJ, has just introduced its new SV72 Series of 2-way inert balanced-poppet solenoid valves. Celebrating its 50th year, Valcor Scientific has been a leader in the design and manufacture of a broad range of pumps and valves for analytical chemistry, biomedical, medical, scientific instrumentation, and light industrial applications.

Valcor's new SV72 Series is specifically designed for the control of corrosive fluids by isolating all the metal components from the operating media. It employs two rolling diaphragms, which act as both isolating barriers and balancing areas.

Suitable for such applications as chemical dispensing, water treatment, medical equipment, control of wash or buffer solutions and other general industrial uses, the new SV72 features:

- Inert construction
- High flow and pressure capability
- Bubble tight shut-off
- Mountable in any position

Valcor's new SV72 is 7" H x 3 1/4" W x 1 1/2" D and offers a pressure rating of 100 PSIG with a Cv of 4.0. The series is available with 115VAC, or 12 and 24 VDC coils.

For more information and free literature about Valcor Scientific's SV72 Series of 2-Way Balanced-Poppet Valves, contact: Valcor Scientific, 2 Lawrence Road, Springfield, NJ 07081, or call: 973-467-8400, Fax: 973-467-9592, or visit our website at [www.valcor.com](http://www.valcor.com).
