Subject: Supplier Quality Manual

Dear Valued Supplier,

Valcor Engineering Corporation strives to continually improve our products and processes to maintain our position as a leading supplier of fluid control components in the Nuclear, Aerospace, Scientific, and Industrial areas. We have created Valcor's **Supplier Quality Manual** to provide guidance to all our vendors. The manual outlines the vendor approval process, performance measures, and general requirements.

We value all of our suppliers. Reliability from our parts is what differentiates a superior product and gives us our competitive advantage. Together we will deliver quality products and satisfy our customer's demanding applications.

Valcor's Supplier Quality Manual as well as Valcor's Terms and Conditions can be reviewed at [www.Valcor.com](http://www.Valcor.com). Click the "Supplier" link for full information. Suppliers should check the website periodically for revision updates. Please contact us anytime with feedback, or questions regarding this new Supplier Quality Manual.

Sincerely,

A blue ink signature of Fran Lucano, written in a cursive style, positioned above a horizontal line.

Fran Lucano  
Vice President Quality Systems
