

# SV76

2-Way Normally Open  
Diaphragm Isolation Valve

Valcor PTFE Instrumentation Series

## DESCRIPTION

The SV76 series valves utilize a PTFE diaphragm to seal on a PTFE seat. As a result, these valves are capable of handling a wide range of corrosive or high purity media by isolating all metallic components from the fluid path. Other materials, including PEEK & PCTFE are available as body material. Consult factory for availability.

## APPLICATION

The SV76 diaphragm isolation series is suitable for a broad range of applications, including:

- Ink Jet Printers
- Chromatography
- Clinical or Chemical Analyzer
- Chemical Mixing/Dispensing
- Laboratory Equipment

## FEATURES

- Diaphragm isolation construction for high purity process
- Handles corrosive and aggressive fluids
- Compact and low dead volume designs
- Low power consumption solenoids
- Bidirectional flow
- Direct acting constructions
- Long life expectancy
