

V3400

2-Way Normally Closed
Fuel Control Solenoid Valve

Valcor Aerospace - 2-Way Direct Acting Shut-Off Valve

DESCRIPTION

This valve is specifically designed to meet the critical weight and volume limitations of aircraft fuel control systems where vibrations, temperature, and cycle life impose severe operating conditions. The V3400 does not require pressure to operate.

APPLICATION

The valve has been successfully used on a wide variety of APUs.

FEATURES

- 2-Way, Direct Acting, Shut-Off (NC) Valve
- Plug-In Design
- Wear Compensating Gate Type Seal
- Self Cleaning Seat Design
- Operating Pressure: 600 psi
- 1 Amp, 18 VDC (30 VDC Max) Operation
- Light Weight: 0.38 Lbs Max
- Low Internal Leakage: 0.55 cc/hr
- Flow Rate: 200 PPH @ 10 PSIG of MIL-C-7024 Type II
